SUMMARY

Enthusiastic computer programmer eager to contribute to team success through hard work, attention to detail and excellent organizational skills. Clear understanding of and training in multiple programming languages. Motivated to learn, grow and excel in the tech industry.

PERSONAL PROJECTS

STRIVE

February 2022

UGA Hackathon: HTML, CSS, JavaScript

- We created a website to act as a platform between contractors and clients for “odd job” type work. During this project, I learned html, css, and Javascript for the first time. I also learned Github, which enlightened my group members and me to the twists and turns involved in group development, whether it's branches, pull requests, or merge conflicts. We also learned how to highlight each of our strengths within the group and contribute our unique abilities to the project, delegating tasks in an efficient and informed manner.

DRAMA APP

April 2022

SwiftUI

- Developed an app in SwiftUI for a course in learning Swift. The app allows you to store your TV dramas, with information about them including whether or not you've finished the drama or plan to watch it, how many episodes you've seen, and any notes about the program. It stores the information inside the sandbox in the user's storage.

PERSONAL WEBSITE

April 2022

React.JS

- Developed my personal website using React.JS for interactive components. The website includes an about me tab and a portfolio tab to showcase my previous work with programming. I learned how to use the react framework while building the website and found it to be flexible and effective for fast development.

EDUCATION

UNIVERSITY OF GEORGIA, Athens, GA

Expected May 2023

Bachelor of Science in Computer Science and Programming

New Media Certificate

GPA: 3.68

PROGRAMMING LANGUAGES

- Proficient in Java, C, C++, SwiftUI
- Experience with HTML, CSS, React.JS
- Understanding of JavaScript

ADDITIONAL SKILLS

- Analytical and critical thinking
- Planning and coordination
- Problem-Solving
